EDUCATION

Bachelor of Technology, Computer Science

Oct 2022 - Jul 2026

Veer Madho Singh Bhandari Uttarakhand Technical University, Uttarakhand

Object-Oriented Programming, Data Structures, Database Management Systems (DBMS), Operating Systems, Networks.

EXPERIENCE

Frontend Web Developer Intern

Jun 2025 - Aug 2025

Buildtech India Construction

- Engineered user-friendly and interactive web interfaces utilizing HTML, CSS, and JavaScript, significantly enhancing overall user experience and engagement.
- Collaborated closely with UI/UX designers to architect responsive layouts across various device profiles, ensuring strict adherence to accessibility and cross-platform usability standards.
- Refactored legacy page components into reusable, modular code, improving maintainability and cutting new-feature implementation time for the team.
- Used Git for version control and participated in code reviews, ensuring clean commit history and smoother collaboration across the development cycle.

Front End Developer Intern

Aug 2025 - Oct 2025

Basti Ki Pathshala, Ghaziabad

- Spearheaded the implementation of modern front-end frameworks to optimize application performance, load times, and core website functionality.
- Debugged and resolved cross-browser rendering issues, improving consistency of the user interface across Chrome, Firefox, and Edge.
- Worked directly with a non-technical team to translate feature requirements into functional, easy-to-navigate web pages.

C++ Developer Intern

Jul 2024 - Sep 2024

Codsoft

- Designed and developed console-based applications leveraging C++, Object-Oriented Programming (OOP) principles, and the Standard Template Library (STL).
- Applied structured debugging and unit-level testing to identify and resolve logic errors, improving program reliability prior to submission.

PROJECTS

Decentralized E-Voting System

React.js, Python, Blockchain

- Developed a secure, decentralized electronic voting prototype integrating blockchain technology to guarantee vote immutability and structural correctness.
- Implemented facial recognition methods to eliminate identity fraud and securely authenticate voters in real-time.
- Designed smart contracts to automate vote recording and result tallying, removing the need for a centralized trusted authority.

Train Tracking System

Vue.js, REST APIs

- Engineered a comprehensive prototype web application to track live train statuses using Vue.js for an interactive frontend interface.
- Integrated real-time APIs to fetch and display dynamic location data, ensuring accurate and timely information delivery for end-users.
- Built a responsive, component-based UI with live status indicators, enabling users to track multiple trains simultaneously without page reloads.

AI-Powered Resume Screening Assistant

Python, LLM, RAG, NLP

- Built an AI assistant that parses resumes and job descriptions, then leverages a Large Language Model with Retrieval-Augmented Generation (RAG) to rank candidate-role fit and surface skill gaps.
- Applied NLP techniques for text extraction and semantic matching, and used vector-based retrieval to ground LLM responses in actual resume content, reducing irrelevant or hallucinated outputs.
- Designed a modular pipeline separating parsing, embedding, and ranking stages, making the system easy to extend to new document formats and roles.

SKILLS

Programming Languages: C++, Python, JavaScript, HTML5, CSS

Web Technologies & Frameworks: Vue.js, React.js, Firebase, MySQL, PostgreSQL

AI/ML: TensorFlow, PyTorch, Scikit-learn, DeepFace (Facial Recognition), NLP, Generative AI (GenAI), Large Language Models (LLM), Retrieval-Augmented Generation (RAG)

Tools & Technologies: Git, Deep Learning Architectures, VS Code, Firebase

Blockchain & Web3: Ethereum, Hardhat, Smart Contract Development, Bitcoin Dev Kit (BDK), Floresta

Cloud Computing: AWS (EC2, S3, IAM Basics), Cloud Fundamentals, Deployment & Hosting Basics, Git-based CI/CD Basics

CERTIFICATIONS

- Introduction to C++
- Full-Stack Web Development Bootcamp
- Freelancing with AI Workshop
